

DESIGNED BY NICOLAS THOMKINS

AIRPORT collection is made of bend-extruded T Profile and corrugated sheet-metals (CSM) that was used by the Junkers Airplane Company of Dessau as the most suitable material to build the first and biggest fleet commercially-used planes. Corrugated sheet-metal (CSM) made of steel or aluminum has been known and mass produced all over the world to cover walls and roofs for any kind of domestically or commercially-used buildings. The corrugation in various proportions is the synonymous for longevity and a never-aging esthetic appearance, CSM is most versatile and cost-effective, production is simple and the applications are boundless. It's typical wave design that has also become the standard appearance for durable high-end travel luggage. Corrugated metal sheets are inserted into flat-metal frames like pictures. By adopting architectural proportions and elements, the Higold 'Airport' outdoor collection can be imbedded in public environments as well as in private gardens and on the terraces.

NICOLAS THOMKINS

CHIEF DESIGNER

NICOLAS THOMKINS, born in Switzerland and based in Germany, has a very large knowledge background and a strong sense of humor. He joined in Higold design team in 2014 and has completed several original designs. Among all, Airport collection, both applicable in outdoor and indoor use, has been regarded as the benchmark of new design trend in furniture industry. The initial application of Corrugated Aluminum Sheets upon furniture has attracted eyes and good compliments from abroad and home. He focuses on product details and user experience by applying ergonomics into product design. His design advocates nature, fulfills positive spirit, and contains his understanding to life and the pursuit to health. He dares to break the rules and touch the soul. His works keep leading the creative trend in the industry of outdoor furniture. The Yin Yang chair from Nicolas, merging the Chinese and Western culture, successfully attracted people's eyes and stood out among all entries, and won the best of the best Red Dot Award, one of the top design awards in the world.

Our carefully selected materials enable Airport to adapt to all-weather outdoor environments and ensure its ideal performance without compromising aesthetics and comfort, bringing you an unforgettable outdoor experience.

AIRPORT TROLLEY

The design of the 'AIRPORT' service-trolley from HIGOLD is based on the robust and versatile function of airline-trolleys. The structure of this container is epoxy-coated aluminum with a yacht teak deck. Glasses and bottles are stored in telescopic drawers and ice-cooled drinks remain fresh in the stainless-steel container. Swivel castors ensure mobility and the built-in locking ensures a firm stand. The AIRPORT trolley is multifunctional, like its raw-model. This practical container offers an additional work surface in the kitchen as well as in gardens and on terraces. On its teak work-top, cocktails can be mixed in style, but also an espresso machine, or BBQ-grills can be operated perfectly here.
